38th International Conference of Data Protection and Privacy Commissioners:
Opening new territories for privacy

PROGRAM
Ladies and Gentlemen,

Welcome to the 38th International Conference of Data Protection and Privacy Commissioners.

It is a great pleasure for the CNDP, the Moroccan Data Protection Authority, to bring together the international privacy community to Marrakesh, one of the imperial cities of Morocco.

This edition aims to highlight topics that are at the same time useful to DPAs’ daily work and instructive to participants. It will definitely strengthen cooperation between DPAs and open new territories to data protection and privacy.

We hope you will enjoy your stay in Marrakech and look forward to a successful edition of our event!

Said IHRAI
Chairman of CNDP
Host of the 38th ICDPPC

Theme I – Privacy and personal data protection as a driver for sustainable development?

09:30 – 11:00: Session I-1: Data Protection and Privacy Law as a Driver in sustainable Development

The processing of personal information is a basic building block for a 21st Century and new applications of data analytics show its tremendous potential value for informing and accelerating sustainable development - ranging from economic well being, education, public health, migration to climate change. Transborder data flows have reinforced the need for countries to build the infrastructure to be part of a global information eco system. A necessary infrastructure is an interoperable data protection legal system, which also adequately addresses new data uses in developing and least developed country contexts. This session will explore the role of data processing for sustainable development, why organizations need laws to assure legal certainty, and how countries have developed compatible systems. A key objective for this session will be a cataloging of lessons learned to be shared within the context of developing and least developed economies.
Moderator: Bojana Bellamy, President of CIPL

Keynote speaker: Brad Smith, President and Chief Legal Officer - Microsoft

Panelists:

1. Teki Akuetteh Falconer, Executive Director - Ghana DPA
2. Chris Connolly, UNCTAD Consultant, Director - Galexia
3. Mila Romanoff, Legal Specialist - UN Global Pulse
4. Boris Wojtan, Director of Privacy - GSM Association

11:00 – 11:30: Tea break and networking

11:30 – 13:00: Session I-2: Adequacy, Localization, and Cultural Determinism

_Are adequacy, localization and cultural determinism efficient measures to strengthen/adapt privacy and personal data protection at the national level or are they non-tariff barriers to smooth transborder data-flow for economic, political and social reasons?_

_This panel aims to give an overview of some of the types and examples, pros and cons of barriers to data flows being erected and explore any alternatives that may ease transborder data flow without compromising privacy and personal data protection._

Moderator: Martin Abrams, IAF Executive Director

Keynote speaker: Giovanni Buttarelli, European Data Protection Supervisor

Panelists:

1. Vivienne Artz, Managing Director & Counsel - Citigroup
2. Elena Donchenko, Deputy Division Head, Roskomnadzor - Russian DPA
3. Bruno Gencarelli, Head of the Data protection Unit - EU

13:00 – 14:30: Lunch (by the Pool – Palmeraie Golf Palace Hotel)
Theme II – How to reconcile security and privacy?

14:30 – 16:00: Session II-1: Oversight and Accountability Principles for Government Access to data

Police and security services, as well as administrative agencies, have legitimate needs to access to data held by the private sector and by citizens. At the same time, such access poses serious privacy concerns. In the years after the Snowden leaks, there has been considerable attention to the rules and standards that should guide government access, to properly balance the interests at stake. Court decisions, governmental and private sector reports, inter-governmental declarations, and academic articles have been issued. This panel will take stock of these developments and aim to synthesize them in a forward-looking way. It will include a diversity of perspectives—governmental, corporate, academic, and civil society. Among other findings, it will present the results of a multi-year study conducted under the auspices of The Privacy Projects, which brought together DPAs, representatives of security services, corporations, academics and civil society advocates for consultation and research, and which has produced a summary set of principles for government access. The panel will include experts from multiple regions and perspectives.
